

## Assessing Against Learning Outcomes, Module 2

### 2.0 Module Introduction

In module 2, we will look more closely at the relationship between learning outcomes and assessment then define assessment validation.

Previously, we explored learning outcomes and assessments. How are they related?

Assessments, when aligned with learning outcomes, ensure that teachers and learners are engaging in those teaching and learning activities which meet their needs. In other words, the teachers are teaching the learners what the learners need to meet their goals in their study journeys.
