

## Assessing Against Learning Outcomes, Module 4

### 4.0 Module Introduction

In module 4, we will complete the final steps in the assessment validation process by making modifications to the assessment task. We are using the example from module 3, the reading task Bank Robbers Throw it All Away.

In the last module, we concluded that although the reading passage itself is suitable, the questions need to be re-written in order to meet the learning outcomes of the course and we need some learner instructions and a marking guide to ensure reliability.
